RF transmissions from 500' to 15 miles, save up to \$5000 in cabling costs...

MTS SENSORS PROVIDES WIRELESS LEVEL GAUGING CAPABILITIES FOR TANK FARMS

CARY, N.C. (June 9, 2003) — MTS Systems Corp., Sensors Division, announced the availability of RF wireless data transmission capabilities for its M-Series digital and analog liquid level gauges. M-series sensors are ideal for cost-effective level, temperature and volume measurement in long gauge tank farm applications. The RF transmitter may be quickly mounted on each tank to provide output readings at a remote central display point via PC or PLC.

“Customers are looking for wireless capabilities,” said Level Plus Product Manager, Adrian Totten. “This system is compatible with major software programs to provide real-time data transmission through existing LAN systems providing plant-wide display functions. The plug and play installation will save money and streamline all Class I/Div. 1 or Div 2 operations.”

MTS PROVIDES WIRELESS LEVEL CAPABILITIES FOR TANK FARM APPLICATIONS, PG.2

The 900 mHZ radio frequency is transmittable from 500 feet to 15 miles and may be used for up to 125 individual transmissions (1 per tank) simultaneously. Each transmitter provides plug and play installation at the tank site and operates on 9-30VDC. The RF system accepts either modbus RTU (M-Series, digital) or standard 4-20mA (MR Series, analog) sensor output.

While MTS' wireless equipped M-Series digital sensors are ideal for tank farms, the technology is also excellent for pipelines and terminals.

For more information on wireless RF transmitter option, visit MTS Sensors Level Plus at WWW.MTSSENSORS.COM or contact: Adrian Totten, MTS Sensors Group, Level Plus Liquid Level Sensors at ADRIAN.TOTTEN@MTS.COM or 3001 Sheldon Drive, Cary, NC 27513, call (800) 457-6620, (919) 677-2332 or fax (919) 677-2350.

MTS Systems Corporation is the world leader in magnetostrictive technology. MTS Systems Corporation is a global operation, with facilities in the U.S., Germany and Japan. In the U.S., the MTS Sensors Division has an ISO 9001 facility manufacturing highly repeatable and accurate Level Plus transmitters as well as the rugged and reliable Temposonics position sensors. With a strong commitment to research and development, product quality and customer service, the Sensors Division is constantly seeking ways to bring the highest value to customers.
