| End of Sale, New Units: | 31 December 2016 |
| End of Sale, Spare Parts: | 31 December 2017 |
| End of Support: | 31 December 2018 |
| Reason for EOL: | Release of next generation LP-Series Obsolescence of some electronic components |
| Direct Replacement: | Tank SLAYER®, RefineME®, SoClean®, and CHAMBERED |

MTS Sensors is initiating the EOL process for the M-Series effective June 6, 2016. The EOL of this product line is a result of the launch of the next generation LP-Series and obsolescence of some electronic components used in the M-Series models. The timeline for the EOL is based on the availability of electronic components used in the M-Series.

Due to hazardous area restrictions, MTS Sensors can only service M-Series products with original electronic replacements. If you have M-Series products installed in hazardous areas it is recommended that you purchase a supply of spare electronics. Once the spare electronics supply is depleted, the entire level transmitter will have to be replaced.

All M-Series can be directly replaced by one of the new LP-Series without the need for mechanical changes to the tank, electrical changes to the wiring, or the loss of any features. To crossover the M-Series model number please contact MTS Sensors directly or one of our authorized liquid level partners.

Please contact MTS Sensors to discuss any concerns about preparing and transitioning your installation from the M-Series to the new LP-Series.
