

Temposonics®

Magnetostrictive Linear Position Sensors

ER CANopen Data Sheet

- Compact sensor model
- Operating temperature up to +75 °C (+167 °F)
- Ideal for flexible mounting

Data Sheet

MEASURING TECHNOLOGY

The absolute, linear position sensors provided by MTS Sensors rely on the company's proprietary Temposonics® magnetostrictive technology, which can determine position with a high level of precision and robustness. Each Temposonics® position sensor consists of a ferromagnetic waveguide, a position magnet, a strain pulse converter and supporting electronics. The magnet, connected to the object in motion in the application, generates a magnetic field at its location on the waveguide. A short current pulse is applied to the waveguide. This creates a momentary radial magnetic field and torsional strain on the waveguide. The momentary interaction of the magnetic fields releases a torsional strain pulse that propagates the length of the waveguide. When the ultrasonic wave reaches the end of the waveguide it is converted into an electrical signal. Since the speed of the ultrasonic wave in the waveguide is precisely known, the time required to receive the return signal can be converted into a linear position measurement with both high accuracy and repeatability.

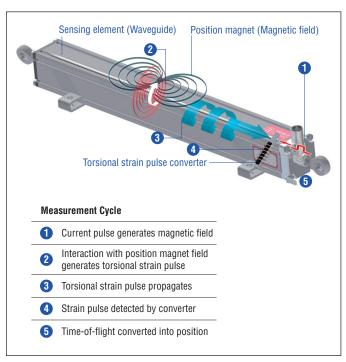

Fig. 1: Time-of-flight based magnetostrictive position sensing principle

ER SENSOR

Robust, non-contact and wear free, the Temposonics® linear position sensors provide the best durability and precise position measurement feedback in harsh industrial environments. Measurement accuracy is tightly controlled by the quality of the waveguide manufactured exclusively by MTS Sensors.

The Temposonics® ER has an aluminum rod-and-cylinder design where the rod can extend and retract from the sensor housing to measure linear position. Inside, a magnet is secured to the end of the rod and remains protected within the sensor electronics housing. Accessory rod ends are available for attaching the rod to the machine's moving part. The rod-and-cylinder sensor design can be installed in any orientation, and provides a convenient and versatile position feedback solution. Typical fields of applications are printing and paper industry, machine tools and plastics industry as well as control systems.

Fig. 2: Typical application: Paper industry

TECHNICAL DATA

Interface	CAN System ISO 11898
Data protocol	CANopen: CiA Standard DS 301 V3.0 / Encoder Profile DS 406 V3.1
Baud rate, kBit/s	1000 800 500 250 125
Cable length, m	< 25 < 50 < 100 < 250 < 500
	120 100 1200 1000
	The sensor will be supplied with ordered baud rate, changeable by customer via LSS
Measured value	Position
Measurement parameters	
Resolution	10 μm oder 20 μm
Cycle time	1 ms
Linearity	\leq ±0.02 % F.S. (minimum ±60 μ m)
Repeatability	\leq ±0.005 % F.S. (minimum ±20 μ m)
Operating conditions	
Operating temperature	-40+75 °C (-40+167 °F)
Humidity	90 % relative humidity, no condensation
Ingress protection 1,2	IP67 (connectors correctly fitted)
Shock test	100 g (single shock) IEC standard 60068-2-27
Vibration test	5 g / 102000 Hz IEC standard 60068-2-6 (resonance frequencies excluded)
EMC test	Electromagnetic emission according to EN 61000-6-3
	Electromagnetic immunity according to EN 61000-6-2
Magnet movement velocity	The sensor meets the requirements of the EC directives and is marked with C €.
Magnet movement velocity Design / Material	≤ 5 m/s
Sensor electronics housing	Aluminum
•	
Guided driving rod	Aluminum
Stroke length	501500 mm (260 in.)
Mechanical mounting	Any
Mounting position	Any
Mounting instruction	Please consult the technical drawings and the brief instructions (document number: <u>551684</u>)
Electrical connection	M10 /F nin) male connector
Connection type	M12 (5 pin) male connector
Operating voltage	+24 VDC (-15 / +20 %); UL recognition requires an approved power supply with energy limitation (UL 61010-1), or Class 2 rating according to the National Electrical Code (USA) /
	Canadian Electrical Code.
Ripple	\leq 0.28 V_{pp}
Current consumption	4060 mA (depending on stroke length)
Dielectric strength	500 VDC (DC ground to machine ground)
Polarity protection	Up to -30 VDC
I Dianty protection	

^{1/} The IP rating is not part of the UL recognition.

^{2/} The IP rating IP67 is only valid for the sensor electronics housing, as water and dust can get inside the profile.

DELIVERY

- Sensor Select mounting accessories regarding your application:
- 1 or 2 rod ends M6 / 1/4"-28 UNF or / and
- 2 mounting clamps up to
 1250 mm (50 in.) stroke length,
 3 mounting clamps for 1500 mm (60 in.) stroke length

Accessories have to be ordered separately.

Manuals, Software & 3D models available at: www.mtssensors.com

^{*/} Non standard stroke lengths are available; must be encoded in 5 mm / 0.1 in. increments. Some preferred stroke lengths may be available with faster lead time. Contact MTS Sensors for details.
